

# Forensic Architecture

a lecture by

## Eyal Weizman; London, Betlehem

Tuesday, 13. April 2010 / 7.00 p.m. /

Lecture hall 102 / Uni Basel, Kollegienhaus (Main Building) / Petersplatz / 1st floor

The lecture seeks to delve into the interfaces between conflict, the urban and the laws of war. As the rubble of 20,000 destroyed and damaged buildings is still scattered through the streets and camps of Gaza, the battle of forensics has begun: who can speak in the name of this rubble? And what new reality can emerge in its stead? Has the chaos, death and destruction been actually instigated with the terrible force of the law?

The lecture will be held in english
